Art Unit: 1614

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 22-37, drawn to a composition and method of modulating pupil dilation using an alpha I antagonist consisting of an imidazoline and an alkylating agent in combination with a compound to reduce redness, classified in class 514, subclass 396.
- II. Claims 38-41, drawn to an eyedropper, classified in class 514, subclass 915.
- III. Claims 42-51, drawn to a method of modulating pupil dilation using an alpha 1 antagonist not including piperaziny, classified in class 514, subclass various.

The inventions are distinct, each from the other because of the following reasons:

Inventions of group I, group II and group III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are drawn to totally different subject matter. Each of the above groups is cable of supporting its own patent.

The searches for the above inventions are not co-extensive particularly as to the literature search required. A reference which anticipated or make obvious the invention of Group I, Does not anticipate or make obvious the invention of any other groups.

Thus, for the above reasons the restriction for examination purpose id proper.

Art Unit: 1614

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
